GEp-IV NPS x HMS trigger projection: 75 μA, 30 cm LH2, 20 ns
Components of the central trigger budget
S1X AND S1Y
S1/S2 3-of-4
elastic signal
baseline γp → π0p
Rate (Hz)
Offline-equivalent NPS threshold (GeV)
Total-rate commissioning envelope
S1X AND S1Y: central
S1X AND S1Y: conservative
S1/S2 3-of-4: central
S1/S2 3-of-4: conservative
Total Level-1 rate (Hz)
Offline-equivalent NPS threshold (GeV)
E12-13-010 run 1918 anchors the 3 m production spectrum; an E12-13-010-period elastic calibration (run 2875) anchors positive-polarity HMS rates. Shaded bands use the trigger-correlated NPS spectrum as a conservative cross-check.
